Q3 FISCAL 2021 OUTLOOK

- **Net revenue expected to be higher in Q3 F2021 vs Q2 F2021 on improved demand fulfillment subject to the risk of:**
 - Positive COVID-19 cases shutting down the facility and requiring staff to isolate
 - Potential suppressed demand due to COVID-19 restrictions for cannabis retail stores, particularly in the most populous province of Ontario
- **Adjusted gross margins expected to be positively impacted in Q3 F2021 by:**
 - Lower cost inventory being sold in Q3 F2021 driven by a lower average cultivation cost per gram incurred in Q2 F2021 as a result of higher plant yields
- **The level of overall adjusted gross margins in Q3 F2021 compared to Q2 F2021 depends on other factors not described above including, but not limited to, product category and brand sales mix**
- **SG&A expected to be slightly higher in Q3 F2021 vs Q2 F2021 largely due to:**
 - Increasing staffing for BAT and EIC transactions

SIGNIFICANT POTENTIAL UPSIDE FOR GROSS MARGINS

Potential to further improve adjusted gross margins over time:

- Expect to gain economies of scale and efficiencies as cultivation scales up
- Potential for greater contribution from higher margin products/formats:
 - New dried flower strains under Edison and Indi brands
 - International sales to Canndoc
 - More multi-pack pre-rolls and 1g vapes (compared to single pre-rolls and 0.5g vapes)
- More automation to drive cost efficiencies (e.g. new pre-roll machine now up and running since March 2021)
- Packaging task force identified opportunities for more cost efficient packaging (starting Q4 F2021)

Note: March 2020 annualized run rate based on Stats Canada December actual sales of \$181M; March 2021E annualized run rate based on Hifyre estimate of \$305M in March 2021
